NEW Events Diary from LTSN Maths, Stats & OR Network... details of events of interest to the maths, stats and operational research community are available via our home page or direct at:

http://mathstore.gla.ac.uk/events_diary

If you have or know of any events which you think might be of interest to the wider maths, stats & OR community please click on [Submit](#) or email info@mathstore.ac.uk

NEW Mathcad User Journal... A sports science team at the University of Bath have developed a mathematical model of the trajectory of a swerving football, helping us to understand just how David Beckham's free kicks hit the spot. Read about this and other recent applications of Mathcad, the essential software for design engineering applications, in the new Spring issue of the Mathcad User Journal, now online. There are details of the new licence-managed version of Mathcad too, plus some valuable hints and tips for the latest Mathcad 2001i.

FREE ActivStats® for MINITAB Demo Now Available! Try out a sample version of this innovative learning tool and experience the best in multimedia statistics instruction.

MINITAB 13.32, Minitab's latest maintenance update to the English version of MINITAB 13, is now available

to download FREE at <http://www.minitab.com/support/maintenance>

Waterloo Maple announces Maple 8... due to be shipped late May 2002.

First public release of a stylesheet enabling the support of MathML in a variety of browsers... Further details are available at: <http://www.w3.org/Math/XSL/>

Waterloo Maple and Brownstone Learning technology partnership... Waterloo Maple a leading provider of advanced software products for mathematics education, research and industry, and Brownstone Learning, a leader in testing and assessment software for higher education markets, announced the creation of a technology partnership that will lead to new intelligent assessment software components for Web-based education in mathematics and science.

MathPlayer beta 3 is now available from Design Science... The biggest change is in the way MathPlayer is installed, it has switched to a normal downloadable installation program, just like Adobe Acrobat or Macromedia Flash. Installing MathPlayer beta 3 is easy. Just go to the MathPlayer home page <http://www.dessci.com/webmath/mathplayer>, click on Install MathPlayer, and follow the instructions.

StatSoft® Ltd

STATISTICA Neural Networks Training Course

The popularity of neural network methodology is rapidly growing in a wide variety of areas from basic research, to data mining applications, business forecasting, risk management, engineering and others. *STATISTICA* Neural Networks is the most technologically advanced and best performing neural networks application on the market.

This two-day course is designed to provide the participants with a thorough understanding of the underlying concepts and the confidence necessary to solve practical problems using *STATISTICA* Neural Networks. The course will be taught by a leading expert in the field of artificial neural networks. No previous experience of neural networks will be assumed.

Dates: 19-20 June
Venue: StatSoft Ltd, Bedford
Cost: £650 per delegate
